DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26, drawn to a system and method of wireless voucher validation, classified in class 705, subclass 75.
- II. Claims 27-30, drawn to a wireless portable computer, classified in class 455, subclass 344.
- III. Claims 31-32, drawn to a gaming apparatus, classified in class 463, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a wireless portable computer having an interface for transmitting verification information. The particulars of the wireless portable computer are not absolute in the method's functionality. Other wireless computers could serve the function of payout verification. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a gaming method that allows accrued game credit to be verified before payout. The invention of group 1 does not require the use of gaming devices for voucher verification. The voucher verification is applicable

Art Unit: 3713

to any pay-for-use-system that needs to verify remaining credits or account maintenance dealing with a central system. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a gaming method that allows accrued game credit to be verified before payout. The particulars of the wireless portable computer are not absolute in the method's functionality. Other wireless computers could serve the function of payout verification. See MPEP § 806.05(d).

Conclusion

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Christopher Vanderlaan on 09/15/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3713

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aaron L Enatsky whose telephone number is 703-305-3525. The examiner can normally be reached on 8-6 M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teresa Walberg can be reached on 703-308-1327. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
